

1. Purpose of Web Site

You can learn a bit more about me

2. What you found most difficult about creating the site.

I'm not good at design, so I don't really know when something looks good or not. For the features, I think the most difficult for me was to use the partials. I understand how it works but I have some difficulties to use them.

3. Elements which are not working

On the contact page, you can send a message, but in fact it does nothing and only redirect you on the home page after 7 seconds.

4. Any part you want to draw my attention to.

Some of the features are very useless and some pages looks empty but that's because I tried to put different things who works.

Rubric**Marking Rubric**

	Outstanding	Satisfactory	Unsatisfactory
Word document 40%	<p>A good idea for an overall application.</p> <p>The server side part is well thought out with appropriate data which has at least two related entities.</p> <p>The API is described fully. It does the standard CRUD but also allows parameters/and or other queries.</p> <p>Document is well written and presented.</p>	<p>The data stored on the server is appropriate but limited.</p> <p>The class diagram is missing or is present but only has one class.</p>	<p>Word document not submitted or has substantial parts missing.</p>
Code 50%	<p>The code is robust and the API is reasonably complex.</p> <p>Evidence of git being used appropriately throughout.</p> <p>Code is well written from a maintenance perspective.</p>	<p>The code works in normal circumstances.</p> <p>Any errors are noted in documentation OR</p> <p>The code works but the API is very small.</p>	<p>The code does not build or there are obvious bugs during normal operation.</p>
Tests and Video 10%	<p>The HTTP request tests fully cover the API.</p> <p>The video shows everything working.</p>	<p>The tests only cover part of the API.</p> <p>The video covers most of the functionality.</p>	<p>Very few test requests.</p> <p>Video missing or doesn't cover the functionality</p>
